

FOR IMMEDIATE RELEASE:

SaberData, Ltd. Announces SaberWire Data Transfer Cable for Vista

AUSTIN, Texas - Jan. 31, 2007 (SEND2PRESS NEWSWIRE) -- SaberData, Ltd., the leader in one step PC Migration, announced the availability of its SaberWire USB data transfer cable that works with Microsoft's Vista operating system. The cable is ideal for transferring data between computers without the need for a network.

Consumers anxiously await the arrival of their new computers with the latest Vista OS and need a way to transfer their large stash of data files from their old computers. The smart SaberWire USB cable solves the problem with a simple Plug and Play operation. Once connected together the computer screen automatically displays each computer for easy drag and drop transfer.

There is no software to install since the code is in the cable.

"This product solves the immediate problem of data transfer for all those people that bought a new computer with Vista or are considering an upgrade to Vista," said Tom Dye, President of SaberData. "Plus, the smart cable can be re-used to transfer data between any two USB equipped computers."

The SaberWire USB cable is available for \$29.95 and can be purchased on-line at <http://www.SaberData.com> .

About Saberdata, Ltd.

SaberData has developed technology and services to effortlessly allow the migration of data and personal settings -- the "Personality" of the computer -- and is headquartered in Austin, Texas (www.SaberData.com).
