

FOR IMMEDIATE RELEASE:

M2SYS Technology Selected by TimeForge to Integrate Fingerprint Software  
Web-Based Employee Scheduling Solution Provider to Offer Fingerprint  
Biometrics

ATLANTA, Ga., July 29, 2008 (SEND2PRESS NEWSWIRE) -- M2SYS Technology, an award-winning fingerprint biometrics research and development firm, announced today that it has reached an agreement with TimeForge, a provider of web-based scheduling and time and attendance solutions to the hospitality industry. Through the terms of this agreement, TimeForge will be providing its customers with a seamless, integrated biometric identification system consisting of M2SYS fingerprint software and fingerprint readers.

TimeForge has successfully integrated Bio-Plugin(TM) WebServer, an enterprise-ready fingerprint software solution designed exclusively by M2SYS, into its web-based workforce management system, TimeForge.com. Unlike a low level fingerprint SDK, Bio-Plugin(TM) enables developers to rapidly integrate and deploy fingerprint biometrics technology without significant cost or effort. TimeForge will be providing the solution to its customers in the retail and hospitality industry who will use the biometric module for indisputable employee time and attendance calculations.

According to Anthony Presley, Founder of TimeForge, "Our customers already schedule their employees online, but many continue to use traditional time clocks to track when employees punch in and out at their business. The M2SYS biometric product allows our customers to easily track time and attendance data and compare it to existing schedules - providing important and accurate payroll information. By eliminating the need for passwords and employee identification cards, it should significantly reduce buddy punching, which will save our customers up to 5-7% of their annual payroll expenses."

"Companies in the retail and hospitality industry are quickly recognizing the benefits of using biometrics, including the reduction of buddy punching and an overall improvement in time and attendance data accuracy," states Michael Trader, President of M2SYS Technology. "We are excited about being chosen by TimeForge, and look forward to a long-standing relationship with them and their customers."

About M2SYS

M2SYS Technology, [www.m2sys.com](http://www.m2sys.com), is a recognized industry leader in fingerprint identity management technology, delivering a wide range of turnkey fingerprint software solutions for businesses and consumers. M2SYS was awarded the prestigious Frost and Sullivan Biometric Technology Innovation of the Year award in 2007.

About TimeForge

TimeForge, [www.timeforge.com](http://www.timeforge.com), is an online employee scheduling and time/attendance software program, designed to meet the demands of the retail and restaurant industries.
