

FOR IMMEDIATE RELEASE:

M2SYS Technology Innovative Fingerprint Biometrics Solution Chosen by Harms Software

Leading Spa and Salon Software Provider to Provide Integrated Fingerprint Software

ATLANTA, Ga., Aug. 12, 2008 (SEND2PRESS NEWSWIRE) -- M2SYS Technology, an award-winning fingerprint biometrics research and development firm, announced today that Harms Software, a leading provider of management software to the spa and salon industry, has agreed to begin providing M2SYS fingerprint readers and software to their customers worldwide.

Harms Software has successfully integrated M2SYS' Bio-Plugin(TM), an enterprise-ready fingerprint biometrics solution, in its award-winning flagship product, Millennium(TM). Harms Software will begin offering Bio-Plugin(TM) as a seamless component to their existing application, instantly providing their customers with flawless employee tracking/management and faster log-in and point-of-sale transactions that result in minimal customer wait-time, and easier overall functionality.

"It was important for our clients to have a simple installation process combined with the ability to share fingerprints across multiple computers," commented John Harms, President and CEO of Harms Software. "Our users have been asking for an easy, reliable way to track which employees are booking appointments and transactions, and a method to eliminate 'buddy punching,' or one employee clocking-in for another. M2SYS provided a turnkey fingerprint software solution that drastically simplified the integration process and they offered the bulk pricing that we needed to make this new technology affordable for our Millennium(TM) clients. The M2SYS fingerprint biometrics solution will bring accountability and reliable logging to Millennium(TM) customers."

"Our goal at M2SYS is to offer our integrator partners the shortest and simplest path to biometric software adoption," stated Mizan Rahman, CEO and Chief Scientist of M2SYS Technology. "Industry leaders like Harms Software aren't interested in allocating the significant development resources that are typically required with a low level fingerprint SDK. Integrating Bio-Plugin(TM) will help Harms Software to rapidly bring a robust fingerprint recognition system to the spa and salon industry."
